COMPANY PROFILE

Melody group of industries was incepted in the year 1988 for manufacturing industrial packaging containers and ever since has been making supplies to some of the India's most famous and established MNC such as Zandu Ayurveda, Indian Oils Corporation, Kores India Limited and many more. With the growing pace, it also entrenched in the field of Pharmaceuticals manufacturing in the year 2000. With a profound reputation for its epitome quality at the best price, it has been able to establish and nurture its network to penetrate its supplies to some of reputed hospitals of the country such as Apollo Hospitals India, Tata Hospitals India to name few. Moreover, it has recently early this year (2014) crossed international waters and launched its own company as Melody rEco Limited (MRL) as a waste recycling business having acknowledged by the Scottish government.

Recently, our group has also entered within the new field of expanded polyethylene foam rolls and sheet. We aim to continue manufacturing exquisite quality products satisfying the highest needs of the customers along with being constantly involved in R&D (Research and Development). We have a state of art facility with the size of 1,50,000 sq. ft. located in Unnao, Uttar Pradesh and having the latest and upgraded international Korean technology which is known to be the most advanced and impeccable technology within the field.

We offer a wide variety of EPE Foams ranging from EPE Foam rolls and EPE Foam Sheets with variety of colour choices. Cellular expanded polyethylene or EPE as it is known is a closed cell, non-cross linked product expanded from low density polyethylene resins using eco friendly butane as a blowing agent. A unique blend of heat lamination and pressure is used to build up the thickness of EPE Foams allowing us to offer Foams with a range of thickness from 2mm to 100mm and even higher to form a laminate and composite multi-layered structure of homogenous bending with taper free parallel nature.

MISSION

"Melody Group of Industries believes in producing excellent quality of products ensuring in-time supply."

VISION

"Melody Group of Industries, with the constant up-gradation & implementation of technological advancements, we aim to produce superior quality products securing financial sustainability to our associates in the face of distributors, dealers while our customers to benefit their desired products at a much competitive price"

ABOUT EPE

Expanded Poly Ethylene (EPE) Foam is CFC free and available in standard forms of rolls and sheet and can be easily made into non-standard cut sheets, die cut components, adhesive backed components, pouches/bags, CD covers, slit rolls and ready to use fabricated fittings of specific tailor made sizes are offered on specific requirements.

EPE comes with high strength cushioning and anti-seismic capability, new environmental protection packing materials. Easy shock absorbance, flexibility, qualitative light with great elasticity and dispersed bending force are the prominent properties of EPE. On the other hand, they are more beneficial to ordinary foam rubber as they can achieve exotic buffer effect, can comprehensively overcome the fragility, deformations, poor resilience and other faults.

EPE is an ideal substitute for traditional packing materials and used widely in the packing and medical, electronic, ceramic, furniture, pottery protection, bag, product commodity, glass and even in the household sectors. EPE further finds its presence appliances, spraying, hardware product, toys and even mattresses.

PRODUCTS

EPE Foam

The EPE Foam rolls at our facility are produced out of the best grade raw materials delivering an excellent quality standard for the products and thus are products are very well accepted and acknowledged. Our EPE product consists of features such as cushioning, shock absorption, thermal insulation, flexibility & resilience, easy to fabricate & water/moisture resistance, non-toxic, hygienic and fungal resistant and are lightweight.

EPE Foam Cushioning

Our packaging materials are offered as per the requirement of the client at an affordable price. We specialize in catering any kind of requirement, ranging from a single piece production to any bulk requirements of our customised products. Our techno-commercial experts undertake all such activities instantly to ensure a smooth functioning.

Description

Custom fitting fabricated packaging for high value items produced in limited volume eliminates the cost of making expensive moulds, more economical than using cps in many cases. Moreover it can be design to any desired specific shape, size or profile of any product by using a simple hot air gun and knife.

PRODUCT DETAILS & DIMENTIONS:

Plastic Type : Low Density Poly Ethylene (LDPE)

Standard Dimensions :

“Roll” : 02mm (Thickness) x 1500mm (Width) x 200m (Length)

“Sheets” : 10mm (Thickness)x 890mm (width) x 1830mm (length)

“Sheets” : 10mm (Thickness)x 1220mm (width) x 1830mm (length)

Spread/Range of products:

“Rolls” : 01mm - 008mm (Single Layer)

“Rolls” : 05mm - 015mm (Multi Layer)

“Sheets” : 10mm - 100mm

Note: We can supply customised products as per the desired requirements, feel free to contact.
